

How to solve the EPBD implementation puzzle?

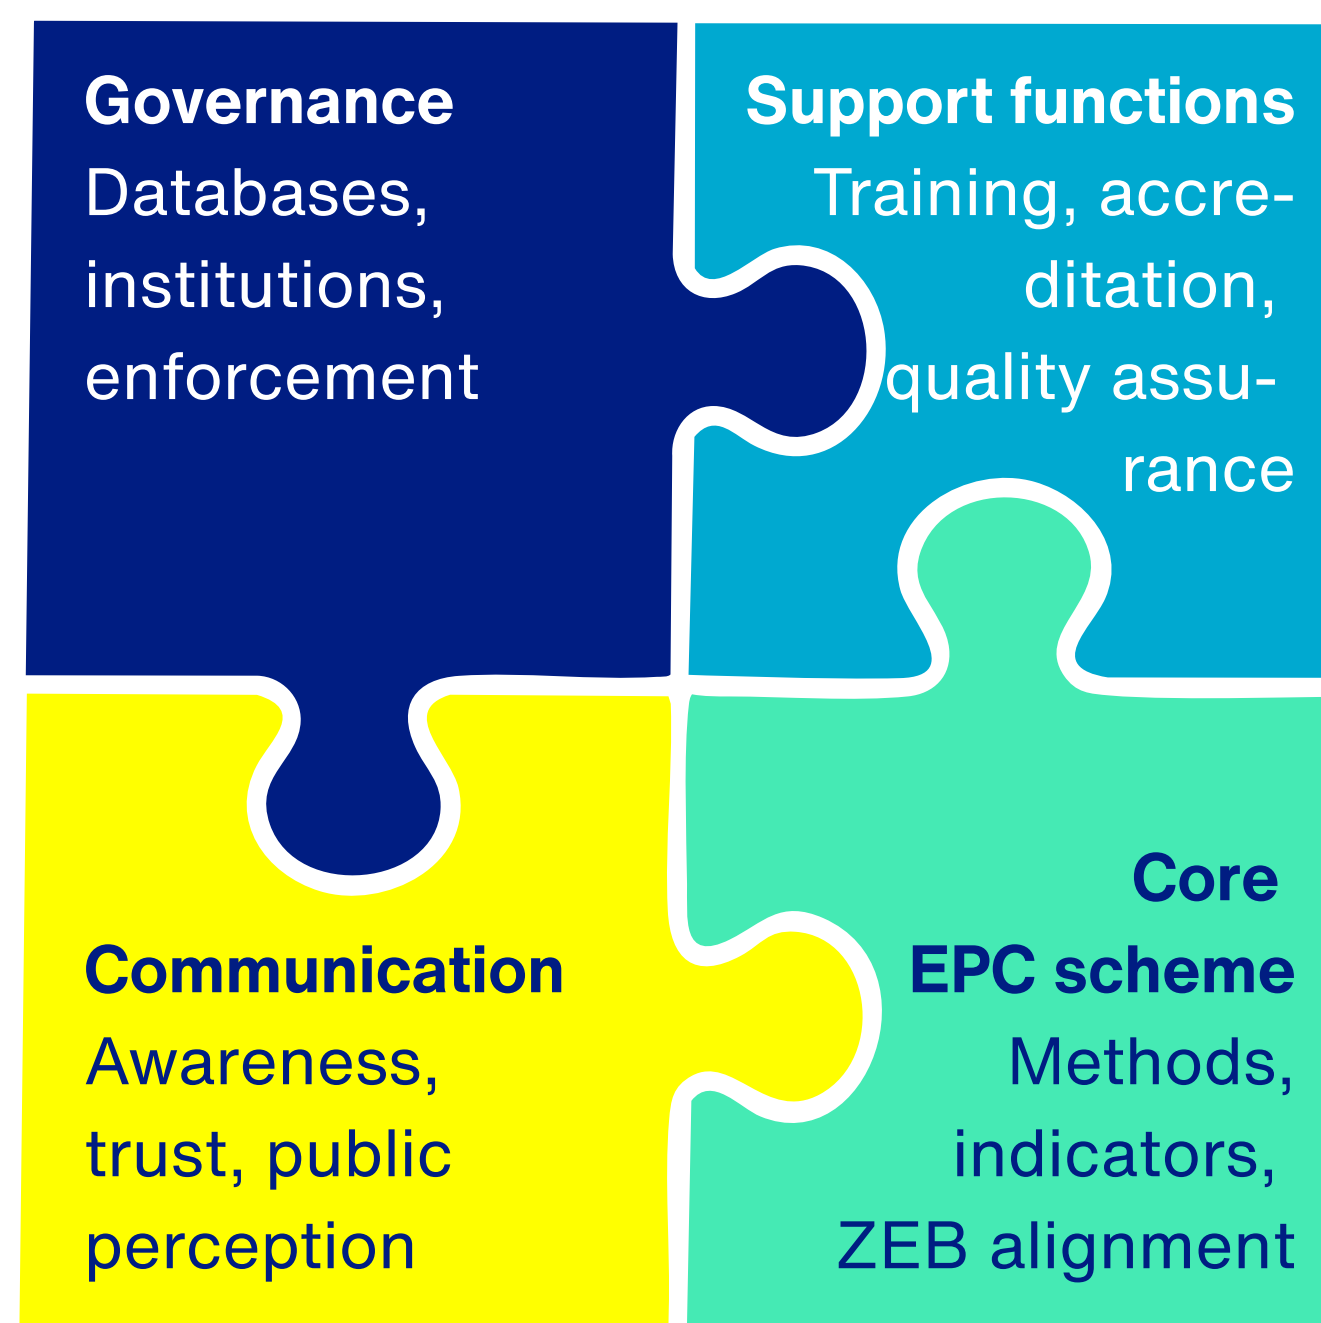

Making energy performance certificates work as renovation tools

Challenges faced by some EPC systems

- Fragmented and siloed databases
- Weak quality assurance and professional capacity
- Generic, non-actionable recommendations
- Low public awareness and trust

A replication and clustering framework

Our recommendations

- Consolidate EPC databases and governance
- Standardise calculation methods and indicators
- Strengthen the design of EPC recommendations
- Train and accredit EPC experts
- Introduce independent EPC quality control
- Launch communication and awareness campaigns
- Embed EPCs in monitoring, reporting and evaluation
